OBJECTIVE

I'm a Software Engineer who has a genuine fascination for machine learning and the expanding world of AI. Throughout my career, I have successfully created and implemented a variety of web applications, leveraging my strong grasp of JavaScript; back-end(Node.js), and React. I'm eager to bring my software skills to a company that has such a distinguished global presence. I'm excited about the opportunity to contribute my expertise on impactful projects and be part of a thriving team.

TECHNICAL EXPERIENCE

JavaScript	Git	Express
Node.js	Github	MongoDB
React.js	PostgreSQL	jQuery

PROFESSIONAL EXPERIENCE

100 Devs Agency, San Francisco, CA
Full-Stack Software Engineer   August 2022-Present
• Integrated and deployed client sites using RestAPIs, MongoDB, and CRUD methods.
• Developed highly responsive applications by leveraging a tech stack comprising JavaScript, MongoDB, Express, Node.js, and React, utilizing a well-structured MVC architectural pattern.
• Implemented Agile methodologies, specifically SCRUM, as a project management approach, resulting in improved team collaboration, enhanced productivity, and on-time project deliveries.

Lucifer's Consulting Web Development, Los Angeles, CA
Web Developer   October 2022-Present
• Amplified online visibility for local Real Estate Brokers by constructing captivating client sites, driving a 35% upsurge in listing views compared to the previous listings on the market.
• Engineered and implemented responsive front and back-end web applications catering to desktop and mobile devices, using JavaScript, Node.js, and React.
• Measurably increased general interest in local businesses by generating traffic to their online site.

Keller Williams Realty, Los Feliz, CA
Realtor agent   October 2018 – August 2022
• Leveraged comprehensive market knowledge and highly effective negotiation skills to expertly guide clients through the home buying and selling process, resulting in a 95% customer satisfaction rate and surpassing sales targets by 20%
•Adapted swiftly to market trends and changing client requirements in the dynamic real estate industry, continuously evolving strategies to stay competitive.
• Demonstrated proficiency in navigating complex real estate contracts and regulations, ensuring 100% compliance with legal requirements and protecting clients' interests throughout the transaction process.

PROJECTS

Sterling Lane Listing - *HTML, CSS, JavaScript, API*
•Developed a real estate listing advertisement website with integrated Calendly API functionality.
• Increased buyer lead generations by 35% through targeted marketing using the live site.
• Tested and implemented SEO strategies leading to improved site visibility.

Star Trek Species Guide - *HTML, CSS, JavaScript, RestAPI*
•Successfully developed and deployed a visually captivating website for Star Trek enthusiasts, showcasing the ability to search many species within the Star Trek universe and display lore and intel of that specific species.
• Utilized JavaScript to create dynamic data retrieval and presentation, ensuring the website remains engaging and informative while delivering optimal performance.
