Summary

I'm a Software Engineer who has a genuine fascination for machine learning and the expanding world of AI. Throughout my career, I have successfully created and implemented a variety of web applications, leveraging my strong grasp of JavaScript; back-end(Node.js), and React. I'm excited about the opportunity to contribute my expertise on impactful projects and be part of a thriving team.

Programming: JavaScript, TypeScript, SQL, MySQL, Python.
Technologies: React.js, Express.js, Node.js, Vue.js, Vite, MongoDB, Tailwind CSS, PostgreSQL , Git & GitHub, Docker, Kubernetes, JSON, Object Oriented Programming (OOP), ServiceNow.

Experience

Lucifer's Consulting Web Development, San Francisco, CA   **October 2022-Present**
Freelance Web Developer
• Amplified online visibility for local Real Estate Brokers by constructing captivating client sites, driving a 35% upsurge in listing views compared to the previous listings on the market.
• Engineered and implemented responsive front and back-end web applications catering to desktop and mobile devices, using JavaScript, Node.js, and React.js.
• Consistently applied Software Development Life Cycle (SDLC) to ensure successful planning, testing, execution, and delivery of robust web applications to meet deadlines.

100 Devs Agency, San Francisco, CA   **August 2022-December 2023**
Full-Stack Software Engineer
•Streamlined project delivery by developing and deploying client sites using RestAPIs and modern web technologies, resulting in a 40% increase in project completion rates.
• Enhanced user experience and performance by crafting highly responsive applications with a comprehensive tech stack (MERN), following a well-structured MVC architectural pattern. This resulted in a 25% improvement in website loading times.
• Implemented Agile (SCRUM) methodologies, fostering seamless collaboration, heightened productivity, and streamlined project deliveries, within cross-functional teams.

Keller Williams Realty, Los Feliz, CA   **October 2018 – August 2022**
Realtor agent
• Applied ethical judgment in navigating complex negotiations, leveraging comprehensive market knowledge and highly effective negotiation skills to expertly guide clients through the home buying and selling process, resulting in a 95% customer satisfaction rate and surpassing sales targets by 20%.
• Demonstrated proficiency in navigating complex real estate contracts and regulations, ensuring 100% compliance with legal requirements and protecting clients' personal and financial interests throughout the transaction process.

Projects

LuxEstate - Vite + React.js, Tailwind CSS, JavaScript || GitHub Repo
• Created a real estate marketplace by implementing advanced authentication methods, including JWT, Firebase, and Google OAuth, ensuring secure and seamless user access. Focused on enhancing the user experience by incorporating features such as image uploads, property listing management, and user-friendly functionalities.

LumenAI - React.js, JavaScript, CSS, Node.js, OpenAI API || GitHub Repo
• Successfully developed and deployed a user-friendly AI language model web application using React.js & JavaScript, providing a seamless platform for users to interact with the transformative OpenAI model, Davinci-003.
